

## PRESS RELEASE

**MILWAUKEE, WI** – November 20, 2006: IGC Technologies is pleased to announce that they have recently been purchased by Brass Ring Capital, Inc., a Milwaukee based private equity investment company. The new company is now known as IGC Technologies, LLC.

IGC Technologies is known as a leader in the foundry supply industry for the development of the **Veinseal**® product range, designed to significantly improve customer processes through the unique ability to combat severe casting defects in iron castings. Equally innovative and value added product solutions manufactured by IGC include **E-Shield**™ & **E-Cast**™ refractory coatings, **Metallpur**™ aluminum alloy fluxing agents, **Mastertop**™ exothermic toppings and **Slag-Getter**™ slag coagulants. IGC is also a distributor of dental plasters, dies stones, abrasives and other industrial products including room temperature vulcanizing liquid mold rubbers and plastic casting resins.

Brass Ring Capital joined with Mr. Ralf Schoenfelder, the former President of IGC Technologies, Inc. to finalize the transaction. Mr. Schoenfelder becomes the Chief Executive Officer of the new company and has retained all management and staff previously in place, ensuring the same focus on quality products and service. Mr. Schoenfelder added: “The old team is the new team and will remain focused on servicing our customers at the highest level.”
